A distinctive putting feel and optimal spin rates are made possible by more durable/softer Surlyn crystalline cover. Enhanced visibility provided by the brightest colors available in the game. Swing Speed: 60 - 90 mph Compression: 80 58 Cover Hardness Available in Orange, Green, Yellow, Pink, Ruby, White or Assorted Orange, Yellow, Green and Pink.

DS-55 is the latest version of the DS (Dual Spin) series by Volvik. The first in the DS series was the DS-77, a popular 77-compression distance ball that specialized in performing like a low spinning distance ball off the tee that increased in spin the closer the golfer got to the green. Volvik has produced the same results with the DS-55, but this is their softest ball ever at a 55 compression. The DS series reduces side spin, slices and hooks for increased accuracy and longer distance. This golf ball is designed for moderate swing speed players needing help with side spin reduction and more distance. Soft core produces a pleasant soft feel, more accurate shot control, and extremely soft putting feel. Swing Speed: 40 - 90 mph Compression: 55 Available in: Yellow, White

2017 GOLF BALL LINE-UP

DS77

The Volvik DS-77 is designed to perform with extreme distance and soft feel. The DS stands for Dual Spin, which means you will experience low driver-spin and longer impact time and less side-spin for straighter drives, while the spin will increase as you move closer to the green to provide a ball with great touch and greater spin around the greens. Features a high Coefficient of Restitution (COR) for maximum ball speed and high velocity core provides maximum ball speed. The 372 dimple pattern delivers increased flight time and reduces drag for more distance off the tee.

Swing Speed: 60 - 90 mph Compression: 77 Available in: Pink, Yellow, Orange, White
